

Life Design® Prime Horse Feed

Features

- Guaranteed levels of lysine and methionine, to allow efficient use of protein for growth and development.
- Carefully formulated mineral levels for bone maintenance and development, as well as supporting electrolyte levels.
- Enhanced vitamin E and selenium levels to support immune response and provide antioxidant benefit to minimize the effects of stress due to training and competition.
- Added biotin to support hoof and hair growth.

Guaranteed Analysis (min. amounts except where noted)

Crude Protein	12%
Lysine	0.6%
Methionine	0.25%
Crude Fat	5%
Crude Fiber	max. 15%
Calcium	min 0.7% - max 1.1%
Phosphorus	0.6%
Copper	40 ppm
Zinc	140 ppm
Selenium	0.5 ppm
Vitamin A	4,000 IU/lb
Vitamin D	450 IU/lb
Vitamin E	60 IU/lb
Biotin	0.45 mg/lb

Feeding Directions

- The following feeding directions are guidelines to maintain desired body condition and performance. Feeding rates need to be adjusted according to the horse's condition and training or competition schedule. Split the recommended level into two or more feedings each day.

	LB Feed Per 100lb Bodyweight
Maintenance/Early Gestation	0.3 to 0.5
Light Exercise/Late Gestation/Breeding Stallions	0.6 to .75
Medium Exercise/Late Lactation (3 Months to Weaning)	.8 to 1.0
Heavy Exercise/Late Lactation (Foaling to 3 Months)	1.1 to 1.6

- Performance horses should be fed at least twice per day and may benefit from being fed more frequently. Horses should have their feeding rate reduced when exercise is reduced.
- Feed good, clean, quality hay or pasture equivalent at the rate of 1.0 to 1.75 LB per 100 LB bodyweight daily.
- Provide plenty of fresh, clean water at all times except to hot, tired horses. Horses should be cooled out properly before having access to unlimited water or being fed. Salt should be available free-choice.
